Trethewey Industries have developed it's unique range of products over the past decade by manufacturing strong and reliable presses. Our aim is to provide our customers with reliable and innovative compacting solutions. This is why we are offering the Trethewey Autobaler. If you wish to further discuss any of our products, have a brochure sent for your perusal, contact our office on the number provided.

Use a Trethewey “Autobaler” and experience the difference

- It has an open top for rapid and automatic continuous loading
- It can be loaded at any time during the compaction
- It offers savings vs traditional balers and twin chamber balers
- It accepts large boxes
- It is economically priced
- It provides medium to high density bales
- It has continuous twine feed to reduce baling time
- Can be offered with various optional extras
- Ease of use for operators
- Service & Customer support nationally

**Strength, Safety,
Innovation and Service...**
